RE: Logistic Solutions Energy Indigenous Partnership Letter

Together Logistic Solutions Energy ('LSE') and SICS Truck Flush & Oilfield Cleaning Equipment ('SICS') have been working together towards a common goal of bringing visibility, transparency and enrichments to the surrounding communities. There is an understanding of the importance of implementing innovative technology and improvements to reduce the environmental and community impact of business relations both on and off treaty land.

Our partnership, formed under the core values of our forefathers' guidance and support outlines how we conduct our business not only within this partnership but outside of it. There is a commitment from both LSE and SICS that we will strive to protect, preserve and return the land affected by our network the same as the caretakers of Mother Earth would.

We strive to reveal and showcase the value of the indigenous communities and the business ventures owned within it. We stand by our commitment to do business with vendors and contractors with like-minded focus. We are aspiring to lead the way in educating and building relationships that improve the indigenous communities.

LSE and SICS are looking ahead to build a stronger future. Our dedication will bring awareness, visibility and transparency to our surrounding communities and all relationships in the future.

Respectfully,

Logistic Solutions Energy &
SICS Truck Flush & Oilfield Cleaning Equipment
